SPICES

Turmeric prices slumped further on improved supplies in the market. Advancement of harvesting activities and slower export enquires weighed on market sentiments. Turmeric export from India dropped 15% Y-o-y to 10.49 thousand tonnes in Jan'24 wherein total export during Apr'23-Jan'24 reported at 131.6 thousand tonnes down by 3.5% from previous year. Fall in exports can be attributed to limited availability of quality produce and higher prices. Prices correction in turmeric is likely to be extended with increased harvesting activities but likely to be limited in wake of lower production outlook ahead. Supplies has started improving with advancement of harvesting activities but still remained below normal due to lower production. Supplies have been below normal in recent week that boosted the market sentiments and buyers remained busy in active buying. Impact of lower production is being seen on arrival pace as about 25.61 thousand tonnes of arrivals touched the major APMC market so far in Mar'24 against the 38.44 tonnes of turmeric of previous year. Festive demand has improved wherein supply has been tighter due to lower production and delayed harvest in Telangana and Maharashtra. **Turmeric prices are likely to face resistance near 18500 wherein support is seen near 17200.**

Jeera futures are expected to trade sideways to higher with improved demand prospects. Increased export demand is likely to support firmness in prices. India exported 12.4 thousand tonnes of jeera in Jan'24 as compared to 8.04 thousand tonnes previous year higher by 54% Y-o-Y. Jeera prices have turned competitive at prevailing rates that attracted international buyers. Exports seasonality of jeera suggest that export demand remains higher during Mar due to strong demand prospects ahead in wake of series of festivals in Mar-Apr. Supplies of new crop have started with advancement of harvesting activities that will cap the gains. **Jeera prices are likely to trade in range of 22500-29000.**

Dhaniya prices are likely to trade higher with weaker production outlook in the market. Fear of yield losses sparked with recent rainfall in northern and central part of India supported buying activities in physical market. Production is likely to be down about 10-15% Y-o-Y due to fall in area and yield. India exported about 83.6 thousand tonnes of coriander during Apr'23-Jan'24 compared to 24.8 tonnes of previous year up by 215% Y-o-Y. Firmness in dhaniya is likely to remain intact due to bleak supply outlook supported by lower production estimates. Increased festive buying will also support firmness in prices. However, new arrivals are likely to commence in coming weeks that will cap the excessive gains. **Dhaniya prices are likely to trade in range of 7500-8000.**

OTHER COMMODITIES

Guar seed futures are expected to trade on positive bias with shrinking supplies in domestic market. Reports of rising export of gum is likely to support prices. Guar gum export rose 30% Y-o-y to 20.05 thousand tonnes in Jan'24. **Guar seed prices are expected to find support around 5150, with resistance seen at 5500. Similarly, Guar gum prices are likely to find support around 9800, with resistance observed at 10600.**

Cotton prices are likely to trade higher on supply tightness in physical market. Arrivals pace has been down due to lower production in domestic market. Cotton Advisory board has projected total cotton production for year 2023-24 at 323.11 lakh bales against the 336.60 lakh bales of previous year. About 83.1 thousand bales arrived on 18th March wherein cumulative arrivals in year 2023-24 reported at 228.15 lakh bales so far. During the cotton season 2023-24, CCI has procured 3265971 bales under MSP operation as on 21st Feb'24. Cotton prices are likely to remain higher due to supply concerns as arrivals are likely to be remain lower in coming weeks as about 65%- 68% of arrivals have touched the market so far in year 2023-24. **Cotton MCX prices are likely to trade in range of 60500-62000. Similarly, Kapas Apr'24 futures are likely to trade in range of 1550-1610 level.**

Mentha oil prices are likely to trade on firm note with shrinking supplies and weaker production outlook for upcoming season. However, reports of sluggish export of mentha oil and menthol will cap the gains. India exported about 1709.2 tonnes of mentha oil during Apr'23-Jan'24 as compared to 2016.7 tonnes of previous year. **Mentha oil is likely to trade in range of 915-950.**

Castor seed prices are likely to trade higher due to tightness in supplies at major trading centers.. At the same time, reports of fall in exports of castor meal will also put pressure on prices. **Castor seed prices are likely to trade in range of 5700-6100 levels.**
